**Subject:** Re: PFAS Data Sharing Between EPA and States - Potential Topics

Thanks, Mike! I'm reaching out to the state folks now and I'll connect with you as soon as I hear who is available.

On Thu, Dec 19, 2019 at 10:59 AM Barrette, Michael <[Barrette.Michael@epa.gov](mailto:Barrette.Michael@epa.gov)> wrote:

Suggested agenda topics for Jan 22<sup>nd</sup> meeting

Sharing “Places of Interest” data

State example – Michigan – public website showing areas with contamination with drill down (potential POC – Stuart Eddy)

EPA example – “Places of Interest” data model being used in conjunction with National PFAS Data Explorer release

Sharing Ambient Monitoring of PFAS (surface water, soil, sediment, biota) via the Water Quality Exchange

State example – Minnesota (or alternatively Oregon) have send lots of data via the Water Quality Portal

EPA example – We could show some screen captures of what the national data looks like

Sharing of Drinking Water Testing Results

State example (potentially California – my notes, which are a bit dated, are below – perhaps Betsy Lichti could speak)

EPA status on being able to receive DW testing data – I would like to invite the SDWIS manager – either Michael Plastino or Renee Morris to discuss the upgrades that SDWIS is making to allow data flow for PFAS data.

---

## California

- Mike spoke with Dan Newton 916-449-5596
  - He was helpful
- Dan connected Mike to Betsy Lichti (betsylichti) [betsy.lichti@waterboards.ca.gov](mailto:betsy.lichti@waterboards.ca.gov) 916-322-9598
- Notes from Mike's call with Betsy's 4/12/19
- CA has not developed a process to get data into SDWIS state
  - They have the data electronically...
  - There is a migration tool with SAIC...
    - The path for getting the data into SDWA state
    - Migration - start in July through end of year
    - May have a tool later this year for continuous reporting this year
  - Schedule sets are needed for each rule to calculate compliance, develop violations and a sampling schedule
- CA will not initially release their data to the public. Beginning of 2020 is the earliest they will release. It will be posted as a data file (bulk)...
- Public Drinking Water Watch also has an interface without bulk download.
- Willing to get their data to EPA once they have made it public

---

The State of California has sent 13267 Investigative Order Letters to Landfills and Airports in California. These letters state the following:  
<https://www.waterboards.ca.gov/pfas/>

- New! [Landfill 13267 Investigative Order](#)
- New! [Airport 13267 Investigative Order](#)
